

## Filming Guideline for CSOFT Happy Dance:

### Before you take the video:

- Make sure the camera lens is CLEAN. Fingerprints and dust will impact the video quality so use your shirt to clean it before clicking start recording button.
- We strongly encourage you to set the video resolution at 1080p, and 30fps (frames per second). If you are an iPhone user, you can find it in Settings-Camera-Record Video. For Android users, usually the setting is inside the camera app

- Please hold your phone HORIZONTALLY, DON'T hold it VERTICALLY

## While you take the video:

### INDOOR LIGHT

#### DO

- Natural light
- Morning / Evening light
- Light that comes from behind the camera
- Balanced light

#### DON'T

- Dark places
- Noon light
- Over exposure
- Strong light from behind the person
- Strong contrast light

### OUTDOOR LIGHT

#### DO

- Natural light
- Morning / Evening
- Balanced light

#### DON'T

- Noon light
- Direct and hard light in face
- Over exposure
- Strong contrast light
- Subject in shadow, and background light
- OUT OF FOCUS

- Please dance in your own way for at least 30 seconds. You can dance from the beginning of the music or from the middle till the end.

#### - Final move:

- We will mute your clip and use the original soundtrack, so background noise doesn't matter.

**After you take the video:**

- Please try to cut your dance clip to at most 60 seconds.
- Upload the video to your OneDrive and share the downloadable link to [tim.zhao@csoftintl.com](mailto:tim.zhao@csoftintl.com)
